

## NOVICE MEET TO BE GREAT GALA EVENT

Science Men in Danger Of  
Losing Their Supremacy  
FREE ADMISSION

Money Changes Hands As  
"Old" Boys Seem Confident  
Of Victory

The K. of C. notarium will witness one of the best Novice Meets in the history of McGill to-night at 8.15 p.m. Probably one of the best aggregations of swimming and polo stars ever brought together at one time are to give exhibition races and will play against the senior polo team. Spectators will be admitted free of charge. All those participating in this meet are to be down at the bath before 8.00 p.m.

Everybody on the team is in good condition, including the "Old" Boys who have been training hard for the past few weeks and they feel certain that the senior team will not be able to put much over them to-night. When questioned last night, the captain declared his team would win by at least two clear goals. Much money changed hands immediately. The Science men might be expected to be depressed as their supremacy in swimming circles is threatened to-night for the first time.

The entries and events for the meet are as follows:—

Event No. 1—Relay Race (4 men 50 yds each)

SCIENCE	ARTS
Moore.....	Marcou
MacLaren.....	Copping
Goddard.....	Kaine
Chisholm.....	Mathams
Young.....	Jardine
.....	Addie
.....	D. Ross

Event No. 2—Fancy Diving

M. H. Moore, Sci.  
C. M. Holt, Arts.  
E. M. Pope, Sci.

Event No. 3—50 yds free style

Heat No. 1—R. Marcou, Arts; H. D. Goddard, Sci.; K. Chisholm, Sci.; P. Mathams, Arts;  
Heat No. 2—G. A. Copping, Arts; L. A. MacLaren, Sci.; E. M. Astwood, Arts.

Heat No. 3—M. H. Moore, Sci.; J. Jardine, Arts; R. Boyer, Arts; G. R. Addie, Arts;  
Fastest second to swim with first three.

Event No. 4—Back Stroke (Exhibition)

G. H. Pliske.

Event No. 5—100 yds, breast stroke.

K. Chisholm, Sci.; C. S. Kaine, Arts; J. Jardine, Arts.

Event No. 6—100 yards free style (Exhibition)

Geo. Vickerson; Vic. Chisholm.

(Continued on page four)

## ATTENTION OF THE SCIENTISTS FOCUSED ON THE ARTS BUILDING

The venerable Arts Building, after being passive for some time, broke into eruption again to-day, and emitted another large volume of plaster, throwing a score into the inhabitants. Just as the five-to-one ball was ringing a huge volume of plaster hurled to the floor and two unfortunate students were buried in the debris. They managed to crawl out and hurried away so quickly in their fright that their names have not been obtained. Excepting these two there were no eye-witnesses of the eruption and it is believed that these two did not have a very clear conception of what had passed. The rear brought a huge crowd to the scene but nothing was discernable in the huge volume of white dust that floated down the stairs except for the yawning crater above. The crater is estimated to measure six feet by five, which is a considerable volume of plaster to receive when it falls nearly fifteen feet.

Scientists are unable to explain the cause of this sudden eruption. William Gentlemen, when approached shortly after the catastrophe, was unable to put forth any theory regarding the cause, but volunteered the information that the plaster came down immediately after the ringing of the five minute bell. The suggestion has been made that the eruption

## MUSICIANS PREPARE FOR COMING FRAY

Rooters' Band Will Also  
Broadcast, is Rumor

The strident yet melodious music which results when the crash of the cymbals and the roll of the drums combines with the sounds issuing from the wind instruments again pervaded the Union House yesterday afternoon when the Rooter's band turned out for one of its practices. The musicians were just as enthusiastic as ever putting all their vigour and their wind in their respective instruments.

The practice which will be held to-day at 5 o'clock will be the last one before the big game on Saturday when Queens brings her husky squad from the Limestone city to do battle with our red and white defenders. It is expected that all the bandmen will be present at this practice especially the absentees who need to brush up on the new music as well as receive their red and white regalia for the game.

Many of the radio fans will be glad to hear that the Rooter's band will broadcast some of their favorite melodies in the very near future. Those who have heard the band will be sure to look forward to the presentation from the receiving end of their radio set; while others who were unfortunately enough to miss hearing the band as yet will be able to get acquainted with it soon via the air waves.

Dame Rumer also has it that the band will soon entertain the audience at one of the fixtures of the National Hockey League at the Forum but arrangements are as yet incomplete.

## A. T. CHAPMAN SPEAKS AT CENTRAL Y.M.C.A.

This evening at eight o'clock A. T. Chapman, of Montreal will speak in the Association Hall, Central Y. M. C. A., Drummond Street, his topic being based on Hammetton's "The Intellectual Life." This forms one of a series of lectures given by prominent local men, under the auspices of the Montreal Y. M. C. A. schools. On February 5, Professor W. T. Waugh, Associate Professor of History at McGill, will speak on Sir Thomas Hardy.

Event No. 7—Final of 50 yds. free style

L. A. MacLaren, Sci.; C. F. Adams, Com.; R. Weir, Sci.; E. M. Astwood, Arts.

Event No. 8—50 yards Back Stroke.

L. A. MacLaren, Sci.; C. F. Adams, Com.; R. Weir, Sci.; E. M. Astwood, Arts.

Event No. 9—100 yards free style

Heat No. 1—R. A. Marcou, Arts; H. O. Goddard, Sci.; W. E. Young, Sci.; G. R. Addie, Arts.

Heat No. 2—K. Chisholm, Sci.; M. H. Moore, Sci.; R. Copping, Arts.

First two in each heat to swim in final.

## FEW TICKETS STILL LEFT FOR INFORMAL

"Rusty" Davis Will Supply  
The Music

TICKETS ON SALE

New Scheme of Buffet Supper to be Introduced

The tickets for Friday's Informal went on sale yesterday at one o'clock.

A large number of the Terpsichorean enthusiasts were on hand to eagerly snap up paste-boards that permit admission to the gala event. However, there is still quite a number left at the Tuck Shop so that anyone who has been able to raise the necessary two dollars in the meantime is assured of getting a ticket. Friday's Informal, according to all predictions, will eclipse all past functions of this sort.

First of all, there will be "Rusty" Davis and his merry men who will supply the music so that there need be no qualms about the standard of symphony. The Committee acting on the suggestion of one of the students, has decided to serve a buffet supper which will do away with the usual wild rush and consequent loss of time. More time will thus be utilized for dancing and should be a welcome feature of the evening. When the dancers feel that the time has come to restore the tissues, they can go down to the Cafeteria, and help themselves, where trays with the usual sweets and ices will be ready for their delight and satisfaction. Supper will be served from ten-thirty till eleven thirty. Please remember the hours so that no one can claim on Saturday morning that he went hungry.

The tickets have been limited to one hundred and fifty, so that there is also the assurance that no one can complain of being crowded for space. The remainder of these that are still unsold will be on sale to-day at the Union, so that the delinquents may have another opportunity to purchase the ticket. The impending publication of the exam results seems to have thrown a cloud of gloom over the campus but those fortunate who have bought their tickets are ready to affirm that it will be dispelled on Friday night.

The Programme of dances is as follows:—

Extra Fox Trot  
1—Waltz  
2—Fox Trot  
3—Fox Trot  
4—Waltz  
5—Fox Trot  
6—Fox Trot  
7—Waltz  
Extra Fox Trot  
8—Fox Trot  
9—Waltz  
10—Fox Trot  
11—Fox Trot  
12—Waltz

## "NATIONALITY" BY LODGE WAS FINE ADDRESS

Speaker is Professor at University of Edinburgh

SPOKE AT R.V.C.

Lecturer has Sincere Faith in  
The League of Nations

Speaking on "Nationality," Sir Richard Lodge, eminent historian and educationalist and Professor of History at the University of Edinburgh in an address given at Royal Victoria College, on Tuesday night, stated that the understanding of what is implied as nationality was absolutely necessary to the success of the League of Nations. The lecture was one of a special history series arranged by the McGill Historical Club. Professor Basil Williams introduced the speaker as a distinguished representative of Edinburgh University and touched on the traditions of the University which were similar to the traditions of McGill and all Scottish Universities.

Sir Richard spoke of the wide general meaning in which the word "nationality" was used. The term had come to have a real political significance. Wars could be waged around this question of nationality and a clear conception of what it implied was therefore imperative to-day. The speaker called attention to the

## DEBATING FINALS

The following men have qualified for the finals in the debating eliminations and are asked to be on hand at 5 o'clock sharp this afternoon in Strathcona Hall where they will again be required to speak on "Canadian Immigration." Judges from the English Department will be on hand. Seven men are to be chosen.

W. Goforth, R. J. Smith, S. Hayes, W. H. Budden, J. Spector, M. M. Alexander, J. J. Campbell, E. D. MacLeod, G. Levy, D. M. Legate, A. N. James, S. Schwisberg.

## SENIORS WILL MEET QUEENS ON SATURDAY

Second Place in League At  
Stake

FORUM RINK

Red and White Players Are  
All Going Well

On Saturday night comes the struggle with Queens for second place in the Intercollegiate league. It is the Red and White's home game and the team is working hard to combat the speedy tricolour stickhandlers. The game will take place at the Forum Rink at 8.15.

Great efforts have been made in the practices since the last game, to improve the passing end of the game, and better combination should be the result. Art Abbot is back at right wing, where he will be able to display his shooting ability to better advantage, for as a right handed shot he was severely handicapped in this respect.

The usual difficulty that has been noticeable this season will be the selection of a goalkeeper for the contest. Jerry Reid's splendid exhibition last week in Kingston certainly demonstrates his ability as a first class man while Cameron's dexterity is well known. Whoever Coach Shaughnessy decides upon, however, will be sure to form a firm backing to the team.

Roger McMahon has been showing up very well, of late, as an individual player. Time after time in the tilt with Queens he singly eluded the tricolours forwards with his quick handling of the puck and had it not been for their stonewall defence he would no doubt, have added to McGill's score.

Now that the fear of examinations is over for a while it is hoped that everybody will show a keen interest and turn out to cheer the team on in one of its most important matches of the season. The student coupon number 21 must be exchanged at the Union between Friday and Saturday noon for general admission, for it will not be accepted at the Rink in its present form.

## ICE FORMATIONS AND NAVIGATION

Dr. Barnes to Speak Before  
Physical Society

The Physical Society meeting to-morrow will be addressed by Dr. H. T. Barnes, who will speak on the work of the International Ice Patrol. Dr. Barnes is especially well qualified to speak upon this subject having attained a national reputation as an authority on ice problems. The troubles caused by the great ice floes have, for a long time, been the object of intensive investigation; the field is a wide one and is of absorbing interest.

The solution of the difficulties is of inestimable value to navigation and many scientists are at present endeavouring to apply modern scientific knowledge in order to obtain a practical solution of the problem. Recent study along these lines has led to many important developments and the near future will undoubtedly add more improvements.

On account of the general interest of the subject and of the position held by the speaker it is expected that a large number, of both staff and students, will avail themselves of the opportunity to learn more concerning one of Canada's problems. The meeting will start at five o'clock and all interested are invited to attend.

## DISCUSS PULP PROBLEM AT BIG CAUCUS

Hon. Eugene Forsey Tells of  
Need For Embargo

CABINET SOON

Prime Minister Officials—  
Keen Gathering of Many  
Notables

What was conceded to be a most peaceful caucus profitably spent in the discussion of the numerous aspects of the pulp problem was held yesterday afternoon when the Government leaders assembled in the Union and laid out the first details for the coming session next Wednesday.

The Hon. Eugene Forsey who left at seven o'clock last night to discuss the problem in the Maritimes before various audiences was the outstanding figure at the meeting answering numerous queries and pointing out the crying need of the Dominion for an embargo. The Right Honourable Jack Spector officiated and was accorded a rousing ovation by the party members present.

Among the many leading lights of the party who gathered were in addition to the Hon. Mr. Forsey and the premier A. A. Macnaughton F. A. Roncarelli H. C. Goldenberg Gerald Almond L. Edel A. Norman James S. Hayes R. Gilles Moutseu who is to be the minister of Marine and Fisheries in the new cabinet. A. H. Akman; H. A. Morrell; Rev. Puddicombe; and A. Edel. Enthusiasm reigned as the Hon. Mr. Forsey dwelt on every detail of the problem discussing the advantages that the C. N. R. would derive from the embargo and the great influx of immigrants that was bound to take place. The Minister of Marine pointed out the certain advantages that the C. G. M. M. vessels would have through the embargo while Mr. Almond spoke in glowing terms of the new Government leader. Mr. Roncarelli discussed the immigration aspects of the problem.

The cabinet is to be announced very shortly the prime minister announced. He spoke optimistically of the outlook. It was definitely decided to retain the name of "Reform" for the party since the consensus of opinion was that the drastic policy that the Government stood for fully justified the name.

(Forsey's Send-Off)  
The Hon. Eugene Forsey who is to leave for the Maritimes at seven o'clock via the C.N.R., showing himself to be truly faithful to the Government cause, it is understood that in addition to his visit to Halifax the minister will touch at Truro Sackville and Moncton where preparations are being made to receive him.

An informal dinner was given the Hon. Mr. Forsey before he left at which the prime minister and some of the satellites of the Reform party were the speakers. Mr. Forsey was accorded an enthusiastic ovation by the large assembly and a large and truly representative gathering saw him off from Bonaventure station. It is understood that he will sweep all before him during the course of his eastern trip.

## PAPERS READ ON CARLETON AND MURRAY

At Meeting of R.V.C. Historical Club

EARLY GOVERNORS

Speakers Were Miss J. Nichol  
And Miss Craig

James Murray and Sir Guy Carleton were the subjects of papers read by Miss J. Nichol and Miss L. Craig at a meeting of the Historical Club of R. V. C. on Tuesday evening.

Murray was born in Scotland in 1721, and, choosing a military career, played a fairly important part in the sieges of Louisbourg and Quebec and after Townshend's departure for England, was left in command of the latter city. He commanded at the battle of St. Poy, and opinions differ as to the wisdom of his conduct there. Murray's character gives the key to all his actions. He was a man of

## MED. 3 HAD EASY TIME WITH ARTS 3

Piled Up a 10-1 Score In  
Class Hockey

In a regular fixture of the Inter-class Hockey League, played on the Campus Rink, yesterday afternoon, Medicine III walked away from Arts III to the tune of 10 to 1. The poor showing of the Arts team can be attributed to the fact that two of their best players, Gorrle and S. A. MacDonald were absent from the line-up. It is quite probable that in the next game with these two men at their regular positions the Arts squad will show up better for they have the makings of a good team.

The first period was very one-sided, the doctors piling up a 6 to 0 score. McEvoy and Quackenbush were prominent in the scoring. The play centered almost entirely in the Arts territory, and Martineau was bombarded with shots. McKenna, the Med's goalie was tested with only one shot during the entire period and which he easily turned aside.

The second period saw a much more hotly contested game and both goalies were kept busy. McKenna was under a barrage of shots and stopped them all except a hard one in a scramble in front of the nets that was impossible to see. Martineau was no so fortunate with the rubber and it sagged the twine behind him four times.

There was a good hard surface of ice which brought forth some fast skating, in which McEvoy, the Medicine Captain, excelled. McEvoy, McKenna and Quackenbush starred for Medicine although the rest of the team all had a hand in the scoring. For the losers, Cowan, Kien, and Galt turned in a very good game.

## CONTESTANTS IN DEBATING SPOKE WELL

Subject Was Canadian Immigration

FINALS TO-DAY

New Men Made Good Showing—Five Successful

Many logical views on the subject of Canadian Immigration were put forth by contestants in the Debating eliminations held yesterday afternoon at 5 P. M. in Strathcona Hall. The Society should hold optimistic views regarding the speakers yesterday who were for the most part, newcomers to the debating field. Good reasoning and good English were the rule, the weakness in most cases being the delivery—on art usually acquired by long practice alone, and the deficiency which is excusable in beginners. Yet for the most part the speakers managed to make a good impression on the judges, although there were trifling inaccuracies in debate etiquette, which could be put down to nervousness principally. The more experienced men showed the form expected of them. B. M. Alexander, J. J. Campbell, E. D. MacLeod, Gordon Levy, and D. M. Legate were the winners.

Selection in immigration was the viewpoint held by most of the speakers, six out of the ten candidates taking this viewpoint. These agreed that flooding the country with an abundance of riff-raff was decidedly injurious, and they stressed the foolishness of Canada expending huge sums to attract these people. Feeling was against oriental immigration, but in favor of the settlement by such steady people as the British. Opinion waxed between optimism and pessimism. However, two speakers, namely Goldenberg, and Campbell spoke well in favour of unrestricted immigration.

The first speaker was H. C. Goldenberg, who discussed the advantages of immigration in a fluent manner. He emphasized that the one remedy for the National debt, and taxation might be distributed over a wider surface. He referred to the years 1903-1914, when Canada was under a policy of unrestricted immigration, and when the trade exports were practically quadrupled. This view was contested by H. A. Morrell, the next speaker, who asserted that while under an unrestricted immigration thousands of foreigners were entering the country, thousands of Canada's own citizens were leaving for the United States. He showed how the unrestricted Oriental immigration had resulted in the Japanese

(Continued on page four)

## ARTS DINNER TO-NIGHT AT MOUNT ROYAL

Big Attendance Expected At  
Annual Function

NOTED SPEAKERS

Representatives From Varsity, Queen's Montreal  
and Western U. Expected

To-night the hard labours of the Arts Dinner Committee will find their reward in the Annual Banquet, at the Royal Hotel. The Freshman and Sophomore classes have begun to respond by degrees, and given this condition it has been decided to sell tickets at the door. The Juniors and Seniors have responded splendidly, as have many past graduates.

Representatives are expected from Varsity, Queen's, Montreal and Western University.

Glen Adney and his renowned orchestra will supply the music during the dinner and also for the songs which will follow. Last year this popular aggregation proved to be one of the features of the evening.

The guest speaker, R. L. Calder, K.C., has since graduating from McGill, brought much credit to his Alma Mater. His name is known all over America as a lawyer and orator of repute. He is naturally much in demand at present and the Arts Society is fortunate in being able to introduce him to the students. Last year Dean Laing of Chicago, formerly of McGill was the speaker at the dinner, and was very well received.

Sir Arthur Currie, Dean Ira A. Mackay, and Dr. Stephen Leacock will also be on the list of speakers. They are very popular with all the students and are known to excel as speakers. Many professors will also attend and sit with the students.

Bob Fortune, the president of the Arts Undergraduates Society, will preside in the capacity of toastmaster. When interviewed to-day he stated that the large registration in Arts this year accounted for the reasonable price of \$2.00 per plate, and that all students should take advantage of hearing the excellent speakers at the Mount Royal Hotel.

The Arts Banquet is the most important event of the season, and all men should make an effort to be present.

## INTERCOLLEGIATE NIGHT ON RADIO

45 Colleges Take Part In  
Concert From W.G.Y.

College yells and songs intermingled with Chinese rhapsodies (in native music), and winding up with a College skit, will feature the "Inter-collegiate Night on the Air," a programme to be broadcast on station W. G. Y. at seven o'clock next Saturday evening, January 31. All radio owners, especially collegians should find this superior in the way of entertainment to the best musical comedy or radio in town.

College men representing the British Isles will take part in an important section of the programme, songs of Canada, the British Isles, New Zealand, Australia, South Africa, and India making up their repertoire. Cheers and songs of the large American colleges will also be given. A quartet of Royal Polytechnic College students, from Sweden who will sing native songs, and Chinese engineers who will render selections of their own land, give the programme a distinctly cosmopolitan taste. The Massachusetts Institute of Technology are presenting a burlesque skit, and to wind up the programme, group singing and one or two short talks will be given. More than 500 college men are taking part, representing 45 colleges and universities. The programme will start at 7.30 P. M. and is being relayed from the Edison Club Hall.

THE ONLY WAY  
A man tells of a printer who started poor twenty years ago, and has just retired with a comfortable fortune of \$50,000. This money was acquired through industry, economy, conscientious efforts to give full value, in donatable perseverance, and the death of an uncle who left him \$40,000. —The Darling Digest.

## HISTORY EXTENSION LECTURES

The Historical Club is one of the few organizations at McGill which treats of a subject matter whose appeal cannot be restricted within boundaries outlined by departments, but rather is one which if properly presented, can attract to its study students and public alike.

The Club is to be commended upon its recognition of the existence of the broader field of service than that of the lecture room, and for its fruitful efforts in instituting extension courses in history. Whether carried on through the devotion of members of the faculty, as was done last year, or under a more pretentious programme which comprises addresses by reputed historians from abroad, the educational services rendered by such public lectures cannot be lightly estimated. Lectures of the calibre of that of Sir Richard Lodge, bringing to their subject a scholarly mind guided by mature judgment and a willingness to serve in the dissemination of truth as interpreted from the world's history, may do much to dispel popular illusions which are conducive to misinterpretations of national and international questions.

Students whose present courses of study do not permit the pursuit of a course in history as fixed by the curriculum, may derive pleasure and profit by attending the extension lectures.

## CONSISTENT WORKERS NEEDED

There is being initiated by the management of the "Daily" an appeal for reporters and contributors which, if viewed in its proper aspect, will be conceded to be of major importance to the student body as a whole. The problem which is at the base of the drive for membership is not one of retrogression but one of stagnation versus expansion. Most students take the "Daily" as a matter of course. Some may have accorded the student publication a passing thought which culminated in a self-applied and probably unanswered query, as to how the "Daily" covered the field of news of interest to its subscribers. The increasing ramification of student organizations is making it virtually impossible for the present "Daily" staff to cover each event, meeting or occurrence by assignment. The management is grateful for the co-operation of secretaries, who whether voluntarily or upon request, supply desired information; but it may readily be appreciated even by the uninitiated, that news obtained by telephone or through vicarious sources is often open to correction, and in any case greatly increases the duties of editorship.

There are vacancies on the reportorial staff of the "Daily", open to students who are interested in journalism. The duties prescribed are not overly arduous. Ability to write well, although desirable, is not absolutely essential. What the "Daily" requires most is men who are genuinely interested in its welfare and who will work consistently. Inconsistency and haphazard methods of work preclude the possibility of any student being an asset to the publication.

## CONDENSED COMMENT

The theft of a McGill banner valued at fifty dollars, which was borrowed by the Science Undergraduate Society for the Plumbers' Ball, is sufficiently serious to warrant drastic action in the matter. There is a possibility that the perpetrator of the theft was motivated by a spirit of playfulness, not realizing the embarrassing position in which the Society would be placed as a consequence of his action nor the seriousness of the offence. It would seem to be necessary, in view of the frequent occurrence of petty pilfering about the University, to resort to the most drastic expedients for preventing their recurrence. Any one capable of the theft mentioned should not be permitted to associate with normal human beings; he should be banished from the University permanently.

## "NATIONALITY" BY LODGE WAS FINE ADDRESS

(Continued From Page One)

danger of confusing states with nations, a danger which the League of Nations must bear in mind. "I believe that the League of Nations has a great future before it. I believe that it is the greatest of all efforts yet made in the cause of peace. But success is not to be got by shutting our eyes to the difficulties before it. Only by clear grasping of these difficulties can we hope to save and strengthen the League," concluded the speaker.

Prof—"Can someone give me a sentence using the word 'unaware' correctly?"

Co-ed—"I can."

Prof—"All right, let's hear it."

Co-ed—"Unaware is what you put on first and take off last." —Ex.

Old Gent—Boy, did you know that a cigarette, properly defined, is "fire at one end and a fool at the other?"

Young Ruffian—Yeah, I know, but there's good tobacco in between. —Ex.

# NOTICES

## HOCKEY PRACTICES

Thurs. 5-6, Squads A. and B.

## CLUB EXECUTIVES

Arrangements have been made with Notman's to take the following groups on the day and hour given below. To avoid confusion will any group which cannot follow this schedule please communicate with the Photographic Editor at the Annual Board room at the Union. The sum, or seven dollars (\$7.00) must be paid at the time of sitting unless other arrangements have been made with the Annual Board.

## THURSDAY JAN. 29.

1.30 p.m.—R.V.C. Music Club.  
2.00 p.m.—Societe Francaise.  
5.00 p.m.—Cercle Francais.  
5.20 p.m.—Chemical Industry Club.  
5.40 p.m.—Chess Club.

## FRIDAY JAN. 30.

5.00 p.m.—Classical Music Club.  
5.20 p.m.—Cosmopolitan Club.  
5.40 p.m.—Choral Society.

## WRESTLING

Monday, Wednesday and Friday.  
6 p.m. at Strathcona Hall.

## BOXING

Tuesday, Thursday and Saturday.  
5 p.m., Molson Hall.

## ARTS DINNER

The Arts Dinner will be held at the Mount Royal Hotel, this evening, January 29th, at 7.30. Tickets may be had from the following: R. V. Fortune, M. Lidstone, C. E. T. Jones, Lawrence Hart, Bill Murchison.

## FOOTBALL MANAGERS

Eight, strong, willing, ambitious, capable assistant managers wanted for next season's rugby squad. Please address applications to 363 Melville Avenue, immediately.

## ROBERT B. BELL,

Manager.

## WINTER CARNIVAL

Dartmouth Outing Club.  
Hanover, New Hampshire, February 5, 6, 7, 1925.

Speed Skating.  
Ski 1 Mile Race.  
Snow Shoe Cross Country 2 Mile.  
Ski Jumping.  
Ski 7 Mile Cross-Country Race.  
Figure Skating.  
Snow Shoe Dash.  
Ski Proficiency Race.  
Snow Shoe Obstacle Race.  
Those desiring to compete please apply to H. Elliot, Med. I.

## M.S.P.E.—MACDONALD BASKETBALL

The third M. S. P. E. basketball match of the season will be played at Macdonald College, to-day, Jan. 29th, at 5 p.m. The train will leave the Bonaventure Station at 4 p.m.

## COM. AND TECH. GRADUATES SOCIETY

The Commercial and Technical High School Graduates' Society, extends a cordial invitation to all graduates of the High School to meet their former class-mates and friends, at a Social Evening to be held on Sat. Jan. 31st, 1925 at 53 Sherbrooke St., West. Dancing will commence at 8.15 p.m. and the executive has provided ample refreshments for all those who desire to spend an enjoyable evening.

## POLITICAL ECONOMY CLUB

The regular meeting of the Political Economy Club, scheduled for the 29th, has been postponed until Feb. 5th, owing to the Arts Banquet.

## CLASS HOCKEY

Owing to the large number of class games to be played, positively no cancellations will be made except in case of inclement weather. All practices and games will take place as scheduled.

W. I. WHITEHEAD,  
Mgr., Class Hockey.

## PHYSICAL SOCIETY

McGill University, Montreal.  
The next meeting of the Physical Society will be held in the Macdonald Physics Building on Friday, January 30th, at 5 p.m.

Dr. H. T. Barnes, F.R.S., will address the meeting on "The Work of the International Ice Patrol."  
All interested are cordially invited to attend.

M. S. HOME,  
Secretary.

## LECTURES IN PHYSICS

On Thursday, January 29 in Room 2, Macdonald Physics Building, at 5 p.m. Dr. E. S. Bleier, will give the eleventh special graduate lecture of this session on "Band Spectra." (This is the second of series of two lectures on this subject.) The graduate lectures will be open to all who are interested.

## ATTENTION! DENT. I AND III.

All men who are representing Dent I and III in Class hockey are asked to report at 6.00 p.m. to-day at Campus Rink, for game against Science. Signed: W. H. WALKER.

## SPEED-SKATERS, ATTENTION!

All those who are interested in speed-skating, are asked to turn out to practice at the M.A.A.A. from 7 to 8 o'clock each evening, and kindly hand in their names to G. J. Pickle, man, manager of speed-skating, or phone him at West, 7616.

## ALL FACULTIES

If your baseball manager has not been chosen, please choose one immediately.

A meeting of the faculty representatives will be called the first of next week.

## INDOOR BASEBALL

Commerce '25 and Medicine '26 will play off to-night for the Inter-class championship. Game to start at 5.15, at the Montreal High School.

## ARTS DINNER COMMITTEE

There will be a meeting of the Arts Dinner Committee at 2 o'clock to-day in the Arts Bldg.

## SCIENCE '26 HOCKEY

The following men are requested to turn out to-night at 6.10 p.m. on the Campus Rink.

Bauman, Moore, M. H., Lister, Pickard, Scanlon, Rinfret, Kyle, Simon and Crepeau.

## MCGILL ROWING CLUB

A general meeting of the club will be held in the club's room in the Union at 5 p.m. Wednesday Feb. 4. All students interested in rowing are welcome to attend.

## CATHOLIC STUDENTS

Sunday service February 1st at 10 a.m., in the hall of St. Patrick's Church. (Dorchester Street entrance) All students cordially invited.

## ARTS '26

The upper year basketball schedule is about to be started, and in order that we make a good showing, all interested are asked to come out to the practice on Thursday, 4 to 5. The following are especially asked to come out:— Abramovitz, Brotman, Brown, Held, Kurner, Adams, Mosely and all others interested.

## ATTENTION RUGBY

Will all those who received Certificates of Award for first grade colours last year, and who played at all this year, please leave their Certificates in the Athletic Manager's office for further entry.

## C.I.R.A.

The intercollegiate .22 rifle match will be held this Saturday Jan. 31 at Montreal High. Everyone belonging to this club should be out in order to hold the cup for another year. This is the first of three matches to be shot between Canadian colleges. Those who would like to learn good shooting should join at once.

## MACCABEAN STUDY GROUP

The next meeting of the Maccabean Study Group will be held this Sunday evening at 8.15 p.m. at the home of E. Freedman, 366 Kensington Ave., Westmount. Rabbi Zlotnik will introduce the discussion for the evening, on "The Ethics of the Prophets."

## RUGBY PLAYERS

All who intend playing Football, next fall, please sign list posted on Union Notice Board. They will then be kept informed of Football affairs during the summer.

## B. W. AND F

The Entry list for Boxing and Wrestling will be open until Saturday. Boxing list at Molson Hall and wrestling entries to be handed in at practices in Strathcona Hall.

## UPPER CLASS BASKETBALL

Any years wishing to enter teams in the Upper Class basketball play-off, should hand their entries in to Mr. Van Wagner, or J. R. Frith, Sci. '27. Practice hours may be obtained from Mr. Van Wagner. No entries will be accepted after the above date.

## ALL FACULTIES

If your baseball manager has not been chosen, please choose one immediately.

A meeting of the faculty representatives will be called the first of next week.

## CHORAL SOCIETY

Will all those who do not intend to attend practices regularly, please return copies of music immediately to any member of the executive, as there is a shortage on account of the increased membership.

## BAND PRACTICE

There will be a band practice in the Ball Room of the Union at five o'clock to-day, Jan. 29, in preparation for the game on Saturday night. All bandmen are requested to be present, especially the absentees who need to brush up on the new music. Sweaters will be given out and coupon no. 21 will be exchanged for admission tickets for the rush seat end of the Forum.

## CHORAL SOCIETY

The meeting of the Choral Society will be at 8 o'clock to-night in the Conservatorium.

## LOST AND FOUND

### LOST

A white silk scarf, please return to R. S. Lajoie, Med. '27

### LOST

Will the person who took a Hall and Knight High School Algebra by mistake, after Chemistry lecture on Monday Jan. 26th, 1 p.m. Please leave same with the janitor in the Arts building. The name of F. Siehel will be found inside this book.

### LOST

At Plumbers' Ball, red leather case containing two keys. Finder please return to Harry at Engineering Building.

### LOST

In the Arts Building a blue scarf. Finder please return same to the janitor.

### R.V.C. '28

The following girls are expected in the R.V.C. Common Room on Saturday, Jan. 31st, from 10 to 11:—

V. Hulin,  
J. Olesker,  
E. Brooks,  
M. Brock,  
A. Fogg,  
A. Languedoc,  
J. Eve,  
M. Mountford,  
C. Lytle,  
B. Wardwell.

### R.V.C. '25

All seniors are requested to go to Notman's and have their graduation pictures taken as soon as possible. Telephone for an appointment to-day.

### R.V.C. MUSIC CLUB

Selections from Mendelssohn and Brahms will be played at a meeting of the R.V.C. Music Club this afternoon at four o'clock in the Common Room. Miss Frances James of the Conservatorium will sing. Tea will be served at the close of the meeting. All women students are cordially invited.

### SCHOOL FOR SOCIAL WORKERS

Social Service students who wish to have a photograph of the class group, price \$1.00, kindly leave your order at Notman's.

### THE STUDENT'S LAMENT

"I'll cut no more, no never,"  
The sighing student said,  
"And every night by candle light,  
I'll cram facts in my head.  
Then bring my text books unto me—  
No more will I step out,  
I'll sit at home with Cleero  
And juggle verbs about."

"There's a good bill at the Palace,"  
The student's room-mate said,  
"Come on, let's cut our two o'clock,  
That class is awfully dead."  
"You know I can't—I promised Dad;  
Gee! I'd like to go old kid—  
Oh, apiece, I think I will."  
Three guesses what he did.

# A Thermal Contrast

Have you noticed how records are being broken in sporting circles this season? Even old man Winter himself is staging a wicked come-back. He's succeeding remarkably well outside—but he cannot invade the Cafeteria.

This afternoon I have prepared for you a very special offering—a French delicacy—

## Marron Sundae

It is prepared from pure ice-cream with the best of "Marrons Pieces" in thick syrup, imported directly from France. The price is 10c. and it is guaranteed to please.

Of course you will be able to get orange or grape freeze and club sandwiches as usual.

Come in and enjoy the summer weather—with music. Bring your own flowers.

Pierre

## PAPERS READ ON CARLETON AND MURRAY

(Continued From Page One)

lent temper, imperious, generous, and proud of his exalted position. He looked down upon the English merchants but liked the French-Canadians. As a military governor he showed ability but he lacked the diplomacy necessary for solving the difficult problems of race, government, and trade which confronted him. Except during the war period, he pursued a policy of clemency towards the French-Canadians, believing that they might be a check on the restless English colonies to the South. He had some trouble with a mutiny at Quebec, and about the time he was made governor he had domestic difficulties also, for his wife, Delia, refused to follow him to Canada, in spite of the appealing letters he wrote to her (an extract of which Miss Nichol read): he thereupon lost his temper and had nothing to do with her for several years; they were eventually reconciled and she followed him to Montreal, but soon died. Six months later Murray married a girl some thirty years younger than himself. While at Quebec, Murray urged the appointment of a lieutenant governor for Montreal, but this was refused and out of the difficulties at Montreal arose the famous Walker affair.

Walker, an English trader, was assaulted by a number of soldiers, following quarrels between the citizens and the troops. At once great feeling was aroused. Murray arranged to hold the trial at Quebec, where there was less excitement and owing to the able but scarcely honest efforts of the advocate Cunningham, the accused men who were actually guilty were acquitted. Later Walker fastened an accusation upon certain prominent officers but these were honourably acquitted. The merchants petitioned for Murray's recall in 1765, and in the following year he was summoned home to answer various charges against him, mainly in connection with the Walker case. This had begun only six months after the es-

tablishment of the civil government in 1764 and had seriously hampered the governor, so that it is difficult to estimate whether Murray's failures were due to himself or to the difficulties which beset him.

After a short discussion, Miss Craig read her interesting paper on Carleton. Born in 1724 he entered the army at an early age, and held the position of quartermaster-general under Wolfe. In 1766 he was sent to Canada to replace Murray and inherited all the difficulties of his predecessor. One of the greatest of these was the question of the civil law: English civil law had been established, but did not work well, as the justices favoured the habitants. Carleton foresaw trouble in the English colonies to the South and wished to conciliate the French. He issued an ordinance giving back most of the old French law, and went to England in 1770 to urge his views on the British government. About the same time, he married, like Murray a woman much younger than himself. In 1774 the Quebec Act was passed giving to the French the privileges which Carleton desired for them. After the outbreak of the American Revolution he sent troops to the aid of the other British forces, and in 1776 the Americans invaded Canada. Carleton repulsed the attack on Quebec, and after the retreat of the invaders American struggles were kindly treated by him. He destroyed Arnold's fleet on Lake Champlain, but did not attack Ticonderoga. He was constantly at variance with Germaine the incompetent Secretary of War, and, consequently, his military powers were restricted and he was soon superseded as governor. By the end of the Revolutionary war, however he was Commander-in-Chief of the British forces in America and had to superintend the peace arrangements and look after the prisoners and Loyalists. In 1786, Carleton, now Lord Dorchester was made Governor General of Canada. Since his previous term new difficulties had arisen, due to the immigration of the Loyalists. Finally the country was divided into Upper and Lower Canada with Simcoe as Lieutenant Governor of Upper Canada. He did not get

## MECHANICALS VISIT JENKINS BROS.' PLANT

Spent Interesting Afternoon Viewing Various Processes

ROYALLY TREATED

Detailed Explanations Were Much Appreciated By The Members

From the time some thirty members of the Mechanical Club left the Union at two o'clock Wednesday in Bramsons cars chartered by the Jenkins Bros., until they were returned in the same cars to their respective homes, not a dull moment was spent by any of the visiting party.

Mr. J. H. Webb, Vice-President and General Mgr. of the company is responsible for the successful outcome of the excursion. His untiring explanations and pleasant personality did much to make the trip pleasant, as well as of a highly educational value.

A well planned itinerary first brought the party to the pattern shop, where the manufacture of intricate patterns necessary for the production of valves was explained in detail. Brass patterns representing many thousands of dollars were systematically filed for future use. The core department was next visited; here, the dexterous hands of girls turned out complicated and fragile cores at lightning speed. In fact the girls were much more adept at this work than their highly scientific visitors, as was proved by one member of the party.

The cores, having been moulded, are dipped in a mixture of molasses and water and placed in oil-heated ovens to bake. As in other baking operations it is imperative to see that the cores are not burnt as this will render them useless. The oil in these furnaces must have proper composition, as for example, if there is more than 0.5% sulphur in the fuel it will have a noticeable deleterious effect on the castings.

On one wall of the core-room a rather ingenious order board is located, on which rows of hooks are placed; each vertical row represents some specific part of the valve, and according to what horizontal row any order card is placed, the priority of the order may be determined. By merely noting the positions and number of order cards the requirements may be ascertained at a glance.

Mr. Webb, having thoroughly satisfied the curiosity of the students, next led the way to red brass or bronze foundry, where the numerous Steel and Harvey crucible furnaces were melting the bronze compositions used for the bodies of the valves. This composition of 85% Copper, 5% Tin, 5% lead and 5% zinc, is heated from 2100 to 2200 degrees Fahrenheit. The temperature being read by a thermo-couple type of pyrometer. The castings, having been cooled to the desired extent, are dipped in water; the temperature at which the castings are dipped determines the final colour of the metal.

Due to the process being mass production, expensive automatic machines are used throughout the machine shop, as many as six operations being done on one large machine. The visitors were impressed with the up-to-date industrial methods of manufacture and inspection throughout the shop.

A chemist is employed by the company to analyse the product and to discover any way in which it may be possible to better the design of the valve. Before passing on to the cast iron foundry and machine shop, the different types and sizes of small valves were inspected, their salient features being explained. The larger valves, which run up to twenty-four inches, are made of cast iron in the company's foundry, and machined in their machine shop. As is the case in the small valve machine shop, automatic machines of a heavier type are used to machine the large valves.

The company, having admirably supplied the onlooker's thirst for knowledge, did not forget the one remaining void as the party found a sumptuous feast awaiting them. While the hungry visitors devoured the smokes and delicious victuals, Mr. Webb told his guests many interesting experiences and answered many questions regarding industrial ten-

## ENGINEERING EDUCATION IS DISCUSSED

At Annual Meeting of Engineering Institute

MANY SPEAKERS

College Graduates Must Be Willing To Start At Bottom

Industry today, even at a minimum production, can absorb more young men than are graduating from the Engineering Faculties of Dominion colleges, but they must be willing to take off their coats and go to work. Part of the responsibility for what is characterized as "a serious situation" in the engineering profession lies far back in our system of general education which teaches the youth that if he studies hard he will never have to work with his hands.

The viewpoint of the Engineering Society on the important question of engineering education was thus summed up by Fraser Keith, managing secretary of the Engineering Institute of Canada, at the second day's convention of the Engineering Institute of Canada in the Windsor Hotel yesterday, speaking from the standpoint of the University and Engineering Society, the manufacturer and the practising engineer.

There are many evidences in this country that the path to success in engineering is changing and that the school of science will find the path to important positions in industry much longer in the future, than it was in the rapid development stage of this continent, when frontiers were being pushed back and new areas developed. Professor C. J. Mackenzie, Dean of Engineering of the University of Saskatchewan, pointed out.

START AT BOTTOM

If the young graduate was to be allowed to think that his training entitles him at once to a superior professional position, there is room for pessimism, but if he is prepared to start at the bottom, even at a laborer's job there was no cause for alarm, as there are many positions in industry which carry both responsibility and a fair salary that will serve as excellent stepping stones for young men of ability on the path upward.

It was not alone in railway work that there were young graduates working as laborers, but in many constructional firms graduates were working as rough carpenters and laborers at a salary fully equal to that paid in purely technical junior positions, and with a purpose that will mean future success for them.

A general opinion that the colleges should not be called upon to stress the technical side of the training at the expense of the purely scientific side was expressed by Professor H. M. Mackay, Dean of the Faculty of Applied Science McGill University. So far as matters pertaining to engineering, as an art and as a handicraft were concerned, an hour in the field might be better than a week in the classroom. The engineering school could not and should not be a professional school to quite the same extent as is the medical school, for it was impossible to bring the mine or the hydro-electric plant within the precincts of the University. Knowledge of fundamentals of engineering science and of practical technique often regarded as the sole stock in trade of the schools had been regarded as but 25 per cent of the ideal qualification by members of leading American engineering societies. Character, judgment, efficiency and knowledge of men were 75 per cent.

On the whole Dean Mackay inclined to the opinion that our present engineering curriculum, properly handled, are capable of giving good results and that they do so in the case of able students.

The feeling that the colleges have an important responsibility in connection with the side of a student's education which affects his character including his personality, was expressed by W. M. Cruthers, A.M.E.I.C., secretary of the Students' course, Canadian General Electric Company, Peterborough. "I believe that the college man has all the advantages, provided personality is equal, so long as he will continue to be a student, but if he does not continue to be a student let him look out for the self-educated man who is continually studying."

STUDY INDUSTRY

An interesting suggestion put forward by Mr. Cruthers was that one or more members of the college staff each year of each college, go out and spend a year in some branch of the industry and work at the everyday problems of that industry at the same

dencies, which due to their practical backing were much appreciated by the students. As a souvenir of the trip each member was given a watch charm model of a Jenkins Valve. At the beginning of the tour Mr. Webb intimated that Jenkins valves were the standard of manufacture the world over. Having seen the exacting requirements the party will no doubt admit that Mr. Webb cannot at least be far wrong.

## R.V.C. MUSIC CLUB WILL MEET TO-DAY

Programme to be Devoted to Brahms and Mendelssohn

The compositions of Mendelssohn and Brahms are to be studied this afternoon at a meeting of the R. V. C. Music Club which is to be held in the Common Room at four o'clock.

The members of the Club will have the privilege of hearing Miss Frances James of the Conservatorium, who is to sing several songs, as well as several well-known performers among the R. V. C. students.

Papers on Brahms and Mendelssohn will be given by Miss M. Hatter and Miss Mae Murray. These will be followed by illustrations of the work of both composers in the form of a violin solo by Miss E. Brooks and pianoforte solos by Miss J. Banford and Miss M. Denny. Tea will be served after the musical programme.

Those who have attended previous meetings of the R. V. C. Music Club need no urging to go again, but it is hoped that others who have not as yet taken an interest in the Club will be present. A special welcome is extended to women students not of R. V. C. who are soon to unite with the R. V. C. members in the Women Students' Society.

## WESLEYAN BOYS TO HOLD SLEIGH DRIVE

Looked-for Social Event Takes Place Next Week

The 125 men from Arts, Science, Medicine and Theology who reside at Wesleyan College seem indifferent to reports from across the border that the world is to come to an end on the night of February 6th. In fact, they have gone so far as to arrange their greatest social of the year for that very night. Many outsiders think they should spend the evening of the 6th getting into their nightgowns and adjusting their wings, but not so with these men. The Annual Sleigh Drive is to be the best one ever staged by the residents of Wesleyan College, and unless the fair sex become awfully scarce every man will be present when the horses start at 8:30.

The plan is to circle the two mountains in three of the largest six-horse sleighs in the city. On the return to the college supper will be served in the dining hall. Places are being laid for 150 and arrangements made for a second sit, if more than that number is present. The remainder of the evening will be spent in games, songs and stunts.

Wesleyan has had many very enjoyable socials this season and will have others too; but the sleigh drive has always been regarded as the season's best and this year will be no exception. Committees on programmes and decorations are working hard and they are certain that their efforts will have better results than those of the religious fanatics and their "world derision" campaign.

## MOUSSEAU AROUSES MEN OF VAUDREUIL

Minister of Marine and Fisheries Well Received

Vaudreuil-Soulanges, Jan. 29th, 1925. "The Honourable R. Gilles Mousseau, Minister of Marine and Fisheries in the Specter Cabinet of McGill Parliament, arrived here last night on the urgent and imperative need of an embargo on pulpwood. Advancing altogether a reduction and lesser expenditures on the Canadian Government Merchant Marine, he challenged the late Glasco administration for its utter inefficiency in the dispatching of rapid freight shipments to China, Japan, and United Kingdom.

The Minister of Marine dealt extensively with the benefit, an embargo would give to the mercantile marine. It would improve direct trade with Great Britain and would lessen consequences of the embargo on the American market.

Enthusiasm and faith in the new government is to be seen everywhere in the constituency. The popular backing the minister received there is and indication that the province as a whole stands behind the party holding at present the reins of power."

STARTING IN RIGHT

Mrs. Recentlywed sent her husband out for a ghost of community silver, and he came home with a knife, fork and spoon from every restaurant in town.

—Ex.

time rubbing shoulders with the engineers actively engaged therein. At the end of the year he would return to college and another would take his place in some other industry. In this way the faculty would be constantly in touch with the most modern ideas and practices. Both colleges and industry would be well repaid by the practice.

I have some socks.  
They are my socks.  
I wear my socks.  
Black ones.  
Green ones.  
Black ones streaked with green.  
Each night when I turn in  
I stand them in corners.  
On the morrow they are in opposite corners.  
I chase them.  
They stick and stand up for me.  
Even though I tread on them.  
They are self-supporting.  
Though I use Paris.  
I wear out my socks.  
They are my socks.  
All know my presence by them.  
I am proud of them.  
They are my socks.

## CORRESPONDENCE

The Daily is not responsible for sentiments of letters published in the correspondence columns. Signed communications from graduates, undergraduates and members of the faculties will be placed in print if they are not of too great length.

Correspondents are requested to observe the unwritten law of the newspaper office—that they write upon ONE SIDE OF THE PAPER ONLY.

No communication will be admitted in this column without the name of the writer being attached, not necessarily for PUBLICATION.

## The Editor,

McGill Daily.

Dear Sir: The letter in yesterday's "Daily" from C. L. Copland has opened up the question of the Lord Rectorship and in view of the closeness of the Special Meeting of the Students' Society it appears to me that a general discussion on the subject is advisable.

The proposal to establish a Lord Rectorship at McGill is an excellent opportunity to establish an Imperial connection with different parts of the Empire which no other university in Canada enjoys. As Mr. Copland points out, it would form another link in the Imperial chain and thus the proposal is worthy of the support of every British McGill undergraduate, but, Sir, as the Amendment is at present worded there is no provision as to the origin of future Lord Rectors. The Amendment to Article IV. of the Constitution, Paragraph no. 2, states that "The first holder of the office shall be a British Subject." It seems to me that there is a danger in the future of bitter dispute upon the choice of a Lord Rector under the proposed clause.

The nomination of three men; one an Empire figure; one a Canadian figure and possibly an American Philanthropist, as third, would doubtless, prove a better contest in which might be lost sight of the original aim of the Rectorship. Therefore, I propose to move an amendment to the proposed change in the Constitution, at the students' meeting, to the above mentioned clause reading as follows:

"And that future holders of the office shall be chosen from within the British Empire and from some component part other than the Dominion of Canada."

This will at first appear possibly as a national slight. Some will attempt the inference that the inclusion of such a clause is a slur upon our National pride, but I consider it advisable to regard the question from a wider viewpoint.

We have at present at McGill a Principalship, a Chancellorship and twenty-five odd offices of the Board of Governors, which are designed particularly for prominent Canadians, and it seems to me that the inclusion of a member of necessarily Imperial origin will have a most valuable effect in maintaining the Imperial link and perpetuating those ideals which are sought for by those who have interested themselves financially and otherwise in the proposal. It seems to me that in view of the peculiar character of this University and its wide connection with the various parts of the British Empire, it is decidedly advisable that some University office of honour especially designed to correspond with this connection should be established, and therefore, it is proper that the Office of Lord Rector should be a distinction conferred only on British citizens domiciled outside of this Dominion.

Finally, I might sum up my argument briefly, in that the establishment of a Lord Rector at McGill has been designed primarily to provide an Imperial tone to the University and that, while we doubtless have many Canadians on whom it could be exceedingly pleasant to confer such an honour, there is an ever present danger of losing the Imperial aspect. It is in that spirit entirely that I put forward the proposal to limit the holders of this office to British subjects outside of Canada.

Yours very truly,

J. GRANT GLASSCO.

Dear Sir:—In connection with the Science Undergraduate dance last Friday night, we should like to bring to the notice of those who were present that the large McGill banner hanging near the door of the ballroom has been removed from the Engineering Building. This banner was only loaned for the occasion and is valued at approximately fifty dollars. The party holding same should immediately return it to the Engineering Bldg. (Harry's office) or to the McGill Union. Otherwise drastic action will have to be resorted to. Any information relative to this matter will be treated as strictly confidential.

## CONTESTANTS IN DEBATING SPOKE WELL

(Continued From Page One)

practically dominating the trade of British Columbia.

Leaving the pros and cons of the situation, E. M. Alexander criticised the treatment of immigrants after they had come to the country. He also stressed the point that immigrants should be told the truth about the country they were coming to, and should be dispossessed of the thought that it was a land flowing with milk and honey, so that when the Canadian government had brought them over, they would not return or emigrate elsewhere but if they came would settle in Canada all their lives.

Mr. Bloomfield taking the selective point of view, thought that only immigrants of quality should be allowed to enter the country.

D. M. Legate in favour of restriction. With labour conditions and unemployment as they are today, he said it would be foolish to fill the country with still more people, especially unskilled workers. He read part of an article by a reliable immigrant who finding it unable to get work in Canada, had to go to the States, where he found congenial employment. He recommended a strict education test such as is used in Australia, to be passed by all immigrants. G. Levy was very optimistic about Canada. He asserted she was at the cross-roads, and should take full advantage of the opportunity.

In forceful language, J. J. Campbell condemned the position taken by Legate. He said that the rift-riff of European nations who had immigrated to the States during the nineteenth and early twentieth centuries had developed into World-renowned scientists and business men, and had helped to make United States the richest country in the World. He said that Canada made a mistake to prefer farm labourers, for no purely pastoral nation in the World had ever achieved greatness.

E. D. MacLeod, by a process of elimination, showed that selection was preferable to either of the extremes—unrestricted and restricted immigration. He would exclude Orientals and Europeans undesirable, but make a special point of encouraging good British immigration. This was endorsed by Brannon Terry Mitchell emphasized the necessity of a Minister of Immigration as the problem demanded individual attention. The last speaker, H. Quinlan believed in immigrants being allowed and invited, providing they could read, and were of good physique.

Generally, the new men did very well, for only one of the successful contestants had figured in a debating team before. The finals will be held to-day at 5 p. m. Those whose names are mentioned, but who do not turn up will be disqualified.

## NOVICE MEET TO BE GREAT GALA EVENT

(Continued From Page One)

Event No. 10—50 yds. free style (Exhibition)

Clayton Bourne will make an attempt to break Canadian Record.

Event No. 11—Long Plunge.

L. A. MacLaren, Sci.; G. R. Addie, Arts; C. F. Adams, Com.; M. H. Moore, Sci.; P. Hughes, Sci.; R. S. Weir, Sci.; I. Jardine, Arts.

Event No. 12—50 yds. Breast Stroke (Exhibition)

Wendell Laidley; Leslie Parsons.

Event No. 13—Final of 100 yds. free style

Event No. 14—Long Plunge (Exhibition)

George Vernot will try to smash new Canadian record.

Event No. 15—200 yds. free style

P. Mathias, Arts; K. Chisholm, Sci.; M. H. Moore, Sci.; P. Hughes, Sci.

Event No. 16—Relay Race (Exhibition) (4 men each to swim 50 yds).
